

# INVISIBLE FIXING SYSTEM

## Invisible Fixing System

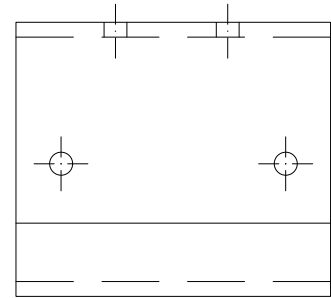

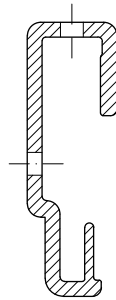

The 'Fixing System' consists of clips and guides produced by GammaStone in black anodised aluminium. The clip is secured to the back of the GammaStone Air panel with two rivets. The upper clips have holes where you can insert screws for adjustments. The Fixing System guarantees perfect mechanical resistance to tearing and in the same way boasts perfect resistance to wind or other atmospheric agents. Practical and functional, it is one of the key products of our proposal.

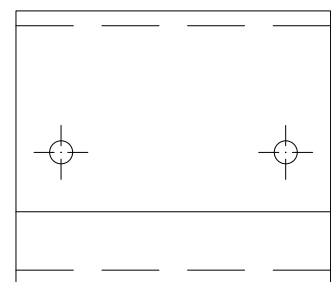

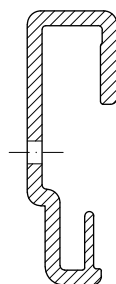

## Clip and guide

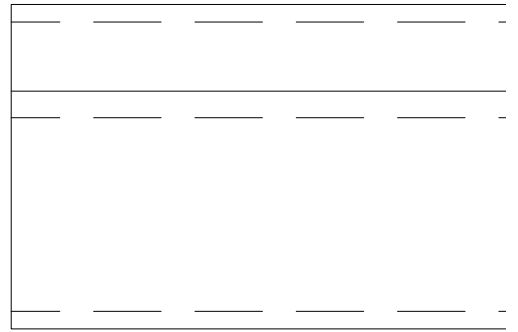

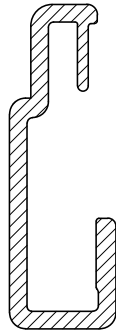

## Adjustable screws

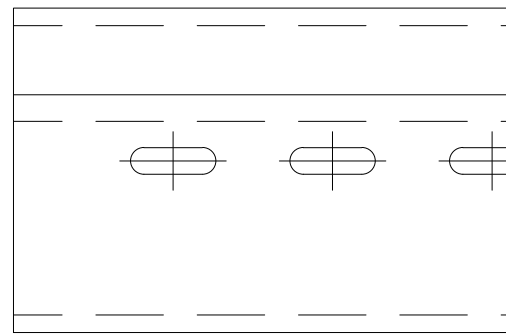

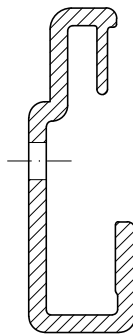

## Sliding point

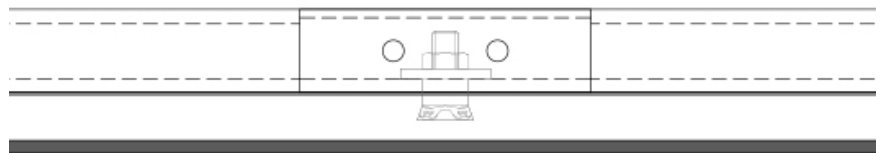

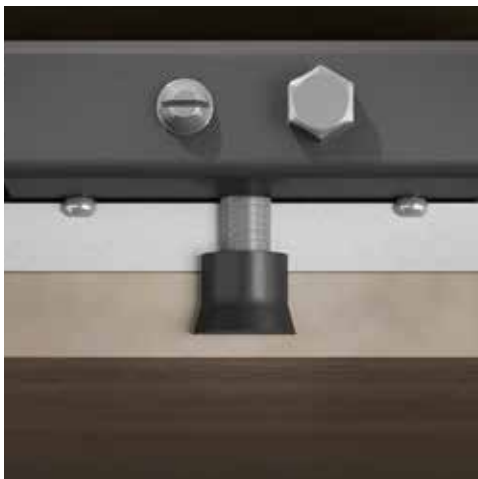

## Horizontal guide

## Horizontal guide and sliding holes

## Mechanical adjustment
